

CM International Industries Corp.

OEM Supplier, Quality Products, Reliable Service with Competitive Price

Our mission is to supply high-quality products to manufacturers at competitive prices. We provide manufacturing and distribution services so that manufacturers in the U.S. can easily access the favorable prices of Chinese manufacturing while maintaining high quality standards.

Our customers are manufacturers in a wide range of industries who engage us to provide components of metal, plastic, and rubber.

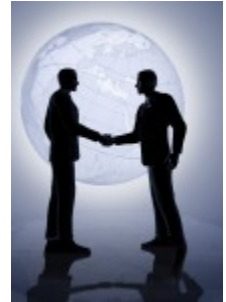

Our capabilities include precision machining, metal stamping, plastic injection molding, rubber molding, investment casting, die casting, metal fabrication and assembly services. Additional OEM products are also available.

Our services include quotes, design reviews, locating and managing manufacturing resources in China, managing the quality of their works on your behalf, shipping to the U.S, customs clearance, warehousing until needed, and just-in-time delivery based on your order releases. Our processes include assistance with design engineering, creation of prototypes, and management on site in China of quality processes.

Our global network can supply parts to plants located all over the world, we also tackle the administrative and compliance issues posed by the international outsourcing and importing process.

Customer satisfaction is our priority. Quality, price, on time delivery, and easy communications are the basis of our long term customer relationships. Long term relationship with our customers is the basis of our growth and success.

Our quality process involves every phase of the product design and development cycle. We assist customers with PPAPs and quality audits. Our suppliers are ISO 9000 certified. We also provide clients with customized Quality Assurance programs utilizing our metrology capabilities. Quality audits are done in China and in the U.S. We would welcome the opportunity to become your choice for manufacturing in China. Please contact us for quotes and more information.

Emily Chen

President, CM International Industries Corp.

CM International Industries Corp.

CM International Industries, Corp. was founded in 1995. Headquartered near Chicago, and with sales locations throughout the U.S., CMI includes a network of sales services, warehouses, and logistics services in strategic U.S. locations to facilitate importation and warehousing of inventory for U.S. based manufacturers' needs. In China, CMI has its own full-time staff of senior engineers and business management, university educated and with decades of experience. To fulfill our U.S. based customers' requirements, they engage and manage local manufacturing companies to ensure reasonable cost manufacturing and high quality standards. We work with your engineering, quality, and purchasing departments to deliver the best manufacturing solutions for your company. This combination of both U.S. and China based operations is the basis for control of quality and for the ongoing customer satisfaction CMI has achieved.

Most of our customers are in the U.S., but we have customers outside the U.S. and can ship world wide.

In the U.S

We have sales contacts across the country. We also have warehousing, inventory management, and order management capabilities. to service your inventory storage, management, and just-in-time delivery needs.

Within our U.S. headquarter we have design engineering capability to help you with your pre-manufacturing design questions.

Our U.S. based team will oversee the arrival, inspection and resolution of any quality questions in the U.S. To reduce quality problems, our U.S. team works closely with our Sr. Engineering team in China that supervises all works in China on your behalf, using product quality assurance methodologies. This close work between CMI's full time staff in both countries minimizes problems once product is in the U.S. Here in the U.S., product quality audit checking programs are implemented where needed or requested.

In China

We have a team of senior engineering and management staff who supervise manufacturing resources in China, and use methodology to ensure the quality of their works on your behalf. They work with a range of manufacturing companies with whom they have long standing relationships and who are open to compliance with CMI's and your quality standards. They also source and develop new suppliers, if needed, to fulfill customers' requirements.

Business in China is based on relationships. We have established the relationships with Chinese suppliers so that you can take advantage of them right away without the costly time investment of building them from scratch in China. This allows you to access the favorable prices of Chinese manufacturing while maintaining high quality standards, without taking years to build new relationships.

Products and Manufacturing Services

CMI manufactures, ships, stores, and delivers to customers across a spectrum of industries. Our products are of high quality and in compliance with our customers' requirements. Because our capabilities include a range of manufacturing services and design expertise, we collaborate with customers to meet unique requirements. Customers make good use of our facilities and services to expand their manufacturing capacity. We constantly seek to earn our customers' respect and satisfaction through service and product quality.

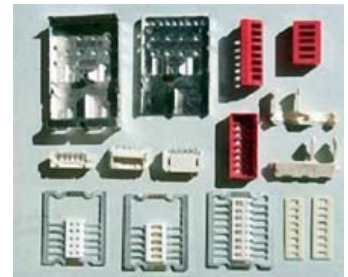

Automotive Components and Parts

Machined Crush Limiter, Insert, Compression Limiter, Housing, Bushing, etc.

Electronic / Telecom Components

Plastic housing, Seals, Connectors, Lead frame, Clamps, Machined stud, Nut, etc.

Hydraulic / Power Tool

Shafts, Pumps, Mining roof, Gear, Spindle, Handle, O-Rings, Fluid Control Fitting and Device, etc.

Equipment Manufacturing

Casting, Machining parts, such as Boss, Bushing, Shaft, Housing, Pivot, and Forging etc.

Plastic/Rubber Parts

O-Rings, housing, etc.

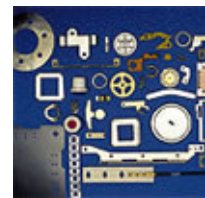

Metal Fabrication

Material: Carbon Steel, Stainless Steel, Brass, Aluminum, various Alloys, etc.

- **Machining** Thread Rolling, Grinding, Knurling, Drilling, Broaching, Milling, Screw Machining, Slotting, Hydraulic Spools and Components, Swiss, Single/Multi Spindle, CNC Machining Centers and Lathes, Precision Turning and Tapping etc.
- **Casting** Die-casting, Investment Casting, Sand Casting, etc.
- **Stamping** Punch, Press, Progressive Die, and Assemblies, etc.
- **Forging** Hot and Cold, Open and Closed Die, Upset, Roll
- **Finishing** Plating, Black Oxide, Anodize.
- **Heat Treatment** Annealing, Normalizing, Tempering, Nitriding, Carbonitriding, Carburizing, Induction Hardening, etc

Plastic and Rubber Parts

CMI provides full service custom molding for any applications. We also have plastic plating and tooling capabilities. We offer short cycle time, close tolerance and cost effective solutions to our customers' needs.

- Injection Molding
- Extrusions
- Over-Molding
- Vacuum Forming
- Blow Molding

Assembly Service

Our manufacturers are capable of handling mechanical & electromechanical sub-assembly jobs. We provide our customers, as part of our integral manufacturing solutions, with the **Supply Chain Management** service which require assembling products. We design and build lean labor-intensive or semi-automated assembly lines for high volume applications that are tailored specifically to meet customers' needs.

Services

Our services include quotes, design reviews, locating and managing Chinese manufacturing resources in China, managing the quality of their works on your behalf, shipping to the U.S, customs clearance, warehousing until needed, and just-in-time delivery based on your order releases. Our processes include assistance with design engineering, creation of prototypes, and management on site in China of quality processes.

Our global network can supply parts to plants located all over the world, we also tackle the administrative and compliance issues posed by the international outsourcing and importing process.

CMI Logistics Services include:

- Shipping to plant locations worldwide
- Local storage of products
- Documentation for customs clearance
- Flexible delivery schedules
- JIT inventory reduction programs
- Customized consignment programs
- Specialized packaging solutions

CMI Quality Assurance Programs include:

- Certified ISO 9000 suppliers
- Project Feasibility analysis
- Engineering assistance with product design
- Third Party Quality Assurance inspections
- JIT inventory reduction programs
- Quality audits of suppliers
- Documentation for PPAPs and first article inspections
